

*Color contoured data indicate relative EM61 response, i.e. metallic structures/materials. Channel 3 represents all electromagnetic responses within the vertical reach of the EM61 instrument. The EM survey was conducted throughout accessible areas, as indicated by black borderline.

EM61 Survey Results – Channel 3*

*Color contoured data indicate relative EM61 response, i.e. significant buried metallic structures. In channel D mode the system suppresses near surface targets that may mask the response of deeper more important targets. The EM survey was conducted throughout accessible areas, as indicated by black borderline.

Channel D Relative Response (Mv)							
Depth (ft)	1	2	3	4	5	6	7
55gal. Drum	600	150	80	50	22	13	7
8" Steel Pipe	180	120	50	38	15	10	5
